

Prometeia among the tech pioneers recognized in inaugural WealthTech 100 list

April 2019

Prometeia – the global provider of Wealth & Asset Management consulting and software solutions – has been selected for the WealthTech 100, the annual list of the 100 world's most innovative providers of digital solutions having a lasting impact on the wealth and asset management industries.

The companies were chosen by a panel of industry experts and analysts who reviewed an analysis of over 1,000 WealthTech companies undertaken by FinTech Global, a data and research firm.

The solution providers making the final list were recognized for their innovative use of technology to solve a significant industry problem or to generate cost savings or efficiency improvements across the investment value chain.

Prometeia supports the wealth management operations of many major institutions, including retail, universal and private banks, financial advisor networks, asset managers and insurers. Its unique business model integrates methodology, technology and processes to support the entire wealth management process end-to-end, combining data provision, consulting services and software.

Prometeia's Wealth Management suite, PFTPro, enables rapid, scalable deployment of wealth management front office tools to improve service quality and reduce cost-to-serve.

"This acknowledgement represents a remarkable achievement for our wealth management proposition in the international market," comments Sebastiano Mazzoni Perelli, Director and Head of the Wealth and Asset Management area at Prometeia. *"But we won't stop: we will keep innovating in the combination of data, models and advanced technology in order to support advisors with highly scalable, automated solutions, leveraging the uniqueness of our business model."*

A full list of the WealthTech 100 can be found at www.WealthTech100.com.

About Prometeia

With over 40 years of experience in economic research, quantitative analysis and model development, Prometeia is a global provider of consulting services and software solutions focused on Risk, Performance & Wealth Management.
